

# Smart building control from anywhere

**The smart building system  
that keeps you in touch  
and in control.**

# Peace of mind

at work and away

## Smart integration

Aritech's smart building system provides you with the flexibility and freedom to adjust your office system, tailored to your evolving needs. From a straightforward door control concept to a powerful integrated intrusion system with access control that can be managed remotely.

## Efficient management

Control your office buildings and integrates your main security technologies seamlessly. Benefit from quick and remote support from anywhere.

## Secure

Our smart building solutions are designed to meet a wide range of high demanding market requirements, such as EN Grade 3. Securing different areas with different access levels in a flexible way, the system is able to adapt and provide the best comfort possible.

While the importance of secure connectivity and the need of cyber security is widely understood, the reality is often different. UltraSync™ makes sure the connectivity of your devices is secured at all times.

# Built for life Designed for you

Aritech's smart building system delivers convenient building automation that's perfectly in sync with your needs. Wherever you are, Aritech is there with you.

# In sync

with your work

Every business is different, and every business owner has different concerns and needs. That's why smart building systems are always tailored to your requirements. They provide a perfect answer to applications ranging from small business and shops to higher security.

## Comfortable

Manage and control on site or remotely all security needs ranging from intrusion and fire detection to access control and video surveillance.

All from one graphical interface, providing you with a clear view of the entire security operation.

## Reliable alarm verification

Aritech's smart building system makes you aware of what is happening, as it seamlessly integrates visual alarm verification solutions like cameras or PIRcam, a state-of-the-art and flexible wireless security solution. Whether through a professional central monitoring station or your own mobile app, PIRcam provides you with a quick and remote assessment of the potentially dangerous situation.

## Flexible

An integrated access system works seamlessly with intrusion detection, resulting in a cost efficient fully integrated solution.

## Accessible

Control your smart building system from anywhere, in your office or while traveling. Check the status of all areas, set and unset your system, control lights, doors...

### Third-party integrations

Integrate into external solutions. Connect different systems used in your building. Please consult your local sales office for further information on possible integrations.

### Management software

An intuitive graphical user interface able to provide dynamic floorplans and manage multiple tasks.

### Advisor Advanced Pro App

This mobile app gives you the flexibility and freedom to adjust your security and building systems to match your lifestyle.

### Optional 24/7 monitoring service

UltraSync™ is supported by a wide range of monitoring stations in your country. Please consult your local website for further information.

# Smart Building solutions

## with management software

Imagine one interface to manage and control, whether on-site or remotely, all of your security needs on various premises, ranging from intrusion and fire detection to access control and video surveillance.

Imagine these different systems interacting thanks to a seamless integration enabling verification of events through video streams, and linking intrusion and fire events with access control to safeguard the safety and security of people.

# Always in touch

Always in control

---

## Every minute counts

An immediate intervention by your security system is critical. With remote management of your building system, the installer can diagnose and support you from virtually anywhere. UltraSync™ enables a quick and secure IP connection, offering value services to improve efficiency.

## One single interface controlling multiple complex systems

The security manager is in control and able to handle every event efficiently. Whenever an alarm is generated, it can immediately be supported by video, which can be retrieved easily at any time. One database for all functions linked to events, where access rights can be altered, eliminates any risk of errors.

# The system that protects

your building and your assets

Affordable and convenient, our smart building solution keeps banks, shopping malls, high-risk retail outlets, office buildings etc. protected and efficiently managed. Whether it's remotely arming or disarming a security system, UltraSync™ connectivity allows you to control your building's security, comfort and accessibility.

Easily and efficiently. Growing together with you and your business.

## Enhanced security. More convenience.

Our smart building solutions are designed to meet high security requirements such as EN grade3. They integrate access control, where different areas with different access levels can be secured in a flexible way.

But also, with UltraSync™, our solutions are able to establish encrypted connections with intelligent edge devices, providing an enhanced security solution.

## Cyber secure

UltraSync™ connectivity allows you to control your security from virtually anywhere. But above all, UltraSync™ ensures that your connectivity is secured at all times, using an end-2-end encrypted communication with VPN technology.

With the increasing potential Cyber Security threats that are emerging, protecting your business becomes a priority.

## Reliable proven system

Our smart building solution is built on well-established technology and has been thoroughly field tested.

UltraSync™ is the standard for over 5 million Aritech manufactured security systems sold throughout the world.

## Data privacy

UltraSync™ has been designed and built in accordance with the Privacy by Design principles, taking into account data protection obligations to enable compliance with data privacy requirements. Apart from the data we store safely and securely on behalf of our customers, the secured connection offered by UltraSync™ does not involve any transfer of data between local devices and remote applications.
