1. Tight buffer optical fiber 900µm
2. Glass yarn with water blocking protection
3. LSZH outer jacket

Applications

This cable can be use indoor or outdoor in a protected environment for short and medium distances.

It's perfect for backbone or distribution application, but can also be used outdoor inside a duct.

Single mode or multimode fibers, meeting or exceeding the pertinent IEC*, ITU and EIA/TIA specifications

Up to 24 tight buffered fibers. Each fiber is enclosed in a 900µm tight buffer made of a thermoplastic polymer coating (1).

Swellable glass yarns (2) are employed for strength members.

An UV stabilized low smoke zero halogen (LSZH) outer jacket (3) is extruded over the cable core.

It has a low rodent protection and medium water tightness and moisture (glass yarn with water blocking protection)
