Carrier

ZW-7001
Module radio ZeroWire 3G Sans carte SIM

Communication

Ce module peut servir de sauvegarde ou de connexion primaire et offre un canal de communication cellulaire sécurisé à toutes les stations centrales qui peuvent recevoir un événement de rapport OH. Ce module radio peut fournir un canal sécurisé pour Up / Download ainsi que le mobile Interface pour la connectivité UltraSync + App.

Rapide

Une carte SIM (2G ou 3G-Données uniquement) peut être placée dans le module radio pour une transmission rapide d'un message d'alarme.

Details

- Module enfichable pour centrale ZeroWire
- Facile à installer
- Antenne intégrée
- Antenne externe en option

ZW-7001
Module radio ZeroWire 3G Sans carte SIM

Spécifications techniques

Généralités

Accessory group	ZeroWire
Type	Module

Environnement

Température de fonctionnement	-10 to 50
Température de stockage	-34 to 60
Environnement	Intérieur

Normes & réglementation

Conformité	CE
Certification	EN50131 Grade 2

General

The ZW-7000 module adds 3G mobile connectivity to the ZeroWire alarm panel, allowing alarm reporting and remote connection over the 3G mobile netwokr via UTC's UltraSync cloud solution. A SIM card is pre-installed and should not be removed.

Connectivity

The ZW-7001 does not require any programming. Once powered, it will automatically connect to the UltraSync cloud server from where several features can be set such as alarm reporting to a central monitoring station as primary or back up path. The ZeroWire system can also send email messages via the 3G module and if the web access is set, it allows both the end user as well as the installer to remotely control and program the ZeroWire panel via the ZW-7001 3G module.
An App allows the user to use an Apple iPhone/Ipad or Google Android device to arm/disarm partitions, enable or disable Chime, bypass zones and manage users. The same App allows the installer to perform basic and advanced system programming.
The UltraSync cloud server will also allow the DLX900 download computer to make a secure connection to the ZeroWire panel via the 3G mobile network without the need to know the system's IP address or IP port settings. It only required to enter the unique serial number and web access code in the DLX900 downloader.
